

Update Notes for Version 20.10.020

Feature enhancements

- 1. **Enhanced speed when opening**
 - a. the appointment screen
 - b. the clinical profile of a patient
- 2. **Load more**
Click on “Load more” in the Clinical Profile to view notes recorded more than twelve months prior to the current date
- 3. **Flag New Results**
In a patient results – new results pending in the Intray are flagged

- 4. **Link to open Intray**
from Patient Results.
- 5. **Change subject of a Letter or Document**
The subject title of a Letter or Document downloaded from messaging software (e.g. Medical Objects etc) can now be changed by using the right click submenu.
- 6. **Letter writer**
The component has been updated for improved stability and memory handling.
- 7. **Drug allergies**
Drug allergies now appear listed on the Drugs Search Form.

Bugs

- 1. Correct spelling error of the word “Authority” on Authority prescriptions.**
- 2. “Authorized by” column in the Results Inray had a bug which could potentially identify the incorrect doctor clearing a result from the Inray.**
